U S E R G O A L S

- The users will understand the content of my project through the grouping of information related to housing.

- The users will understand the primary objectives through the multiple tasks they undergo in finding an apartment.

- Content and features with the type of form:
    - options for what they prioritize (boxes they can check off)
    - a way to step back (back button on the pages)
    - visualization of the locations (graphic of map)
    - step-by-step processes (forms/dialog boxes)
    - displaying information regarding costs (bar graphs?)

- The users think my interactive project should work through the use of having several steps to get the desired result. Their experience will be engaging through the many interactions and graphics on the webpage.
